Re: Letter of Support for Energy Efficiency Upgrade at GGS

I am pleased to express my support for the Energy Efficiency Upgrade grant application being completed by Gallatin Gateway School staff and community. Over my tenure on the School Board - 9 years -, I have watched Dr. DeBruycker and the staff at school band aide and cobble together equipment and resources to make our school as safe and as effective as possible for children.

This planning grant will provide an exploration into what really needs to be done at our school regarding safety and energy efficiency. It will provide a means for doing things right concerning safety for children and cost effectiveness for our district.

This project has my complete support. I am grateful for the opportunity the Montana Department of Commerce provides schools such as ours.

Sincerely,

Erik Yager  
Board Chair
