To: Quality Schools Grant Application Review Committee
From: Celia O'Connor, Board Chair
Re: Letter of Support for Energy Efficiency Upgrade at Gallatin Gateway School

I want to express my support for the Energy Efficiency Upgrade whose grant application is being completed by the Gallatin Gateway School staff and community. I have watched (over my 15 years as a member of the Gallatin Gateway community and my 5 years as a member of the Board of Trustees for the Gallatin Gateway School District) our superintendent/principal, Dr. DeBruycker, and the dedicated staff at our school work to patch and cobble together equipment and resources to make the school as safe and effective as possible for our students.

This grant will enable the school to provide the best in safety and energy efficiency for our students and the community. It will provide the means for the best in safety for the students and in cost effectiveness for our district.

This project has the complete support of the Board of Trustees, the staff, and the Gallatin Gateway community. The opportunity that this grant from the Montana Department of Commerce provides for schools such as ours leads to improved student safety and an improved educational environment.

Sincerely,

Celia O'Connor
Board of Trustees Chair
