Jared Black won top honors in the Gallatin Gateway School science fair for his project on acid rain.

## Gateway holds science fair, concert and unveils logo

Gallatin Gateway School held a science fair and spring concert and unveiled a school logo for the newly named "Gateway Gators."

Students in all grades participated in last week's science fair and were judged by invited guests. Sixth grader Jared Black was the overall winner of the science fair for his project on acid rain.

Eighth-grader Kathy Topel won the first new logo T-shirt for her

illustration of a Gallatin Gateway Gator. The students used to be known as the Hornets.

The spring concert, titled "Sing Around the World with Gallatin Gateway," included each class singing songs from a different country. The countries included the West Indies, Mexico, Japan, Hawaii and Australia. Some special features included dressing up in national costumes, a Mexican

hat dance, and a puili stick performance.

The world tour ended with a selection of songs from the United States presented by the girls' chorus. Some of the songs had choreography arranged by the girls.

Gallatin Gateway School's annual track event will take place June 4 on the school playground. Events will be held for each grade

levy with a special category for preschoolers.

Activities will include Frisbee accuracy throw, softball throw, standing long jump, running long jump, high jump and short and long races.

After a pot luck lunch in the school cafeteria, "just for fun" competitions will be held in the afternoon. These activities will include tug of war, teacher relays and surprise races.
